BAE SYSTEMS

February 22, 2012

To the Employees and Management of Triton Metals:

On behalf of BAE Systems and the Next Generation JISCC program, I would like to thank all of you that worked so hard to help us meet our very stringent deadlines over the past couple of weeks. It was very important to our customer that we were able to assemble a complete system for display at a high profile national conference this week. Considering the exceptionally short lead times that you were given to help us with this task we could not have been more satisfied with the extremely quick turnaround of the parts that we asked be fabricated at your shop. I can really appreciate the coordination and the teamwork that it took to make this happen not only in your own organization, but in working with our organization as well. If it were not for the professional working relationship that you and our own Christina Knull have maintained, there is no way we could have achieved this short term objective. In the end, your great work will help promote our product to an important customer and will hopefully turn our short term objectives of promotion into a long term partnership and many articles of production.

Thank you so much for your support. I look forward to working with your group in the very near future.

Sincerely,

Jason Dvorak
Project Manager
Next Generation JISCC Program
